

Master's in Language Sciences

Area of specialisation: Linguistic Revision and Consultancy

Learning Goals

This area of specialisation aims to enable professionals from different areas to develop and promote good practices in the use of the Portuguese language. It is intended that students develop the ability to critically evaluate the use and functioning of the written and oral Portuguese language, recognise and be able to select appropriate forms for different communicative situations and textual genres, and are able to solve problems concerning the functioning of the Portuguese language.

Study Plan

Curricular Unit	Semester	ECTS
Language Functioning	1	10
Text Functioning	1	10
Norm and Variation	1	10
Instruments of Linguistic Normalisation	2	10
Theories and Practices of Writing and Textual Revision	2	10
Optional curricular unit	2	10
Dissertation/Internship with Report/Project	3	30

Master's in Language Sciences

Area of specialisation: **Terminology and Management of Specialised Information**

Learning Goals

This area of specialisation aims to lead students to acquire fundamental knowledge of terminology as a central element of the language and of specialised discourse, of information and the organisation of knowledge, in mono- and multilingual contexts. This knowledge will enable students to undertake professional activities in areas related to specialised translation, technical communication, lexicography and teaching of languages for special purposes, among others. Focus will be given to quality-related issues for the improvement of processes leading to the management of specialised content.

Study Plan

Curricular Unit	Semester	ECTS
Lexicology and Lexicography	1	10
Theories in Terminology	1	10
Optional curricular unit	1	10
Computational Linguistics	2	10
Terminology and Ontologies	2	10
Optional curricular unit	2	10
Dissertation/Internship with Report/Project	3	30
